

Prachar tour of Rev. Shivraj Tyagi Ji - A report from Houston, Texas

With the blessings of Her Holiness Satguru Mata Savinder Hardev Ji Maharaj, Houston saints were blessed with the Prachar visit of Rev. (Dr.) Shivraj Tyagi Ji and his wife Rev. Bimla Tyagi Ji from Boston on April 9th, 2017. Local saint Rev. Sheelu Keswani Ji worked hard to invite people from different religions and beliefs including Rev. Bob Elixier from Family Federation Church and Dr. GuruBhakti Ji from ISKCON temple. Around 90-95 people attended the satsang on Sunday. There were many people who had come to satsang for the first time.

In his discourse, Rev. Tyagi Ji said human mind wants scientific evidence of everything we believe in. He said spiritually we have known that all humans are similar but this has been proved scientifically that

99.9% DNA of all human beings is exactly same regardless of our color of skin. He said he worked in the Emory University, Atlanta for 10 years and his worked involved collecting blood samples of people. Due to ethical reasons, he had to label the blood samples as A, B, C, D, etc. He said no one could tell the difference in samples as to which color human being this blood has been drawn from. God created us equal and our blood is so similar and yet we do not realize our brotherhood.

Rev. Tyagi Ji said every day in our life is very important and we must value it. He said if we assume 100 years of human life then we have roughly 35000 days or around 5000 weeks. We spend so much of our lifetime in doing things that ultimately do not matter at all and we do not give priority to God in our life which matters the most. Giving an example, he said, if we put 'number one' in front of zeros, the values of zeroes increases significantly but if we put 'one' at the end then it is 'just one by itself'. Everyone must realize the real purpose of our life. Soul came from the super soul and ultimately merges in it. Everyone

Prachar tour of Rev. Shivraj Tyagi Ji - A report from Houston, Texas

who has taken birth must leave this body. Therefore, we must give utmost importance of God in our lives.

Rev. Tyagi Ji also spoke about the five principles of mission and how they are so important to living a blissful life. He said we may have a harmonium and an interested person who wants to play it but one cannot enjoy the sound of harmonium without learning it from someone who has already mastered the instrument. In the same way, to have a blissful life, God must be realized from the True Master.

Rev. Tyagi Ji said we cannot deceive God as who we really are. He gave an example of a sculptor who was so good that when his time of death came near he created so many sculptures that looked exactly like him. When death angels came to get him, they could not identify the real sculptor. They had to go back without taking the sculptor with them. But they came back with an idea. This time when they went back, they praised the sculptures first but then angels said there is just one problem in these sculptures. On hearing this, the sculptor got up and said, 'what is wrong?' The sculptor's ego got better of him. Rev. Tyagi Ji said, in our weekly "To do list", we should add satsang so that we can have a blissful life.

After the satsang program was over, some people expressed their desire for God knowledge and they got blessed.
